# PUTTING THE SMART IN YOUR LOCK™

## EMBEDDED TECHNOLOGY, CLOUD SERVICES, APPS, AND OEM PRODUCTS FOR SMART LOCKS.

KoreLock provides industry-leading, end-to-end Smart Lock enablement for our customers. Our comprehensive smart lock platform includes embedded firmware, ready-made or custom PCBs, cloud infrastructure, mobile and web apps, and RemoteLock software integration, enabling our customers to significantly reduce overall development costs and time-to-market.

### OUR CUSTOMERS

#### Lock Manufacturers

Utilize KoreLock embedded technology and software stack (firmware, cloud service, mobile and web apps) to smarten up existing or new electronic locks.

#### Lock Brands

Expand your portfolio of locks for new target markets or use cases. Improve your customer's experience by leveraging our intuitive apps and the RemoteLock software platform.

#### Specialty Lock Hardware

Extend smart lock functionality beyond traditional doors to niche or specialty locking devices such as bike lockers, cabinet locks or gates.

#### Platform & Software Companies

Deepen your offering with your own smart lock, including the specific features, functionality and software integrations you need.

## KORELOCK BENEFITS

### Resource Efficient

Save time and money, and reduce development risks by leveraging KoreLock's proven end-to-end tech stack.

### Remote Management

Our patented WiFi technology allows direct connectivity to existing WiFi networks while sustaining up to 18 months of battery life.

### Local Management over BLE

Secure Bluetooth functionality, including lock/unlock, user management, settings, history and mobile credentials.

### Smart Offline Functionality

Use our smart offline credentials including mobile keys and algorithmic PINs in non-connected environment.

### Credential Flexibility

The KoreLock platform supports multiple credentials types including PINs, temporary PINs, algorithmic PINs, cards and mobile credentials.

### RemoteLock Integration

All KoreLock-powered locks are integrated with RemoteLock's cloud software, providing access to dozens of hardware and software integrations.

## OUR SOLUTIONS

### EMBEDDED ACCESS CONTROL TECHNOLOGY

Make your own PCB, work with KoreLock to create and manufacture customized PCBs, or use the KoreLock Module, a plug-n-play "lock on a chip" that provides a full access control feature set, WiFi connectivity and Bluetooth®.

### ENABLEMENT SERVICES

KoreLock offers engineering and development services including requirements definition, factory management, project management, Printed Circuit Board design, production and custom firmware development.

### OEM PRODUCTS

With over 10-years experience working with lock manufacturers, KoreLock delivers successful hardware solutions. We help customers to either brand existing hardware already powered by KoreLock or to work with our manufacturing partners on new products.

### CLOUD SOFTWARE

KoreLock provides intuitive mobile and web applications for local and remote access control. Our KoreLock-powered locks are also integrated with RemoteLock's cloud software providing access to dozens of additional hardware and software integrations.
