

# SMART LOCK SOLUTIONS

## CONVERT OFFLINE ELECTRONIC LOCKS TO WI-FI DIRECT SMART LOCKS

KoreLock provides industry-leading, end-to-end Smart Lock enablement for our partners and customers. Our comprehensive smart lock platform includes embedded firmware, ready-made or custom PCBAs, cloud infrastructure, mobile apps, and integration with third-party access control software. This enables our partners and customers to significantly reduce overall development costs and time-to-market.

### WHO USES KORELOCK

#### LOCK MANUFACTURERS

Deploy KoreLock's embedded IoT technology and software stack to develop new Wi-Fi-ready electronic locks. Leverage our intuitive mobile and integrated apps to improve your customers' experience.

#### SPECIALTY LOCK HARDWARE & BRANDS

Expand your portfolio of locks for new target markets or use cases. Extend Smart Lock functionality beyond traditional doors to niche or specialty locking devices such as lockers, cabinet locks, or gates.

#### PLATFORM & SOFTWARE COMPANIES

Deepen your access control offering with your Smart Lock with our cloud-to-cloud APIs and the specific features, functionality, and software integrations you need.

## KORELOCK BENEFITS

### Resource Efficient

Save time and money, and reduce development risks by leveraging KoreLock's proven end-to-end tech stack.

### Remote Management via Wi-Fi

Our patented WiFi technology allows direct connectivity that extends battery life while operating on existing Wi-Fi networks.

### Local Management over BLE

Secure Bluetooth functionality, including lock/unlock, user management, settings, history and mobile credentials.

### Credential Flexibility

The KoreLock platform supports multiple credentials types including PINs, temporary PINs, algorithmic PINs, cards and mobile credentials.

### Smart Offline Functionality

Use our smart offline credentials including mobile keys and algorithmic PINs in non-connected environments.

### Patented Technology

By investing in and developing new patents, KoreLock positions its partners to offer cutting-edge solutions and stay ahead of the market.

## OUR SOLUTIONS

### EMBEDDED ACCESS CONTROL TECHNOLOGY

Make your own PCBA, work with KoreLock to create and manufacture customized PCBAs, or use the KoreLock Module, a plug-n-play "lock on a chip" that provides a full access control feature set, WiFi connectivity and Bluetooth®.

### ENABLEMENT SERVICES

End-to-end services for developing custom Smart Locks from factory sourcing to mobile apps. KoreLock's engineering and development services include requirements definition, factory management, project management, PCB design, production, and custom firmware development.

### OEM PRODUCTS

Smart Lock products that are market ready and that can be white labeled by customers. KoreLock helps customers to either brand existing hardware already powered by KoreLock or to work with our manufacturing partners on new products.

### CLOUD SOFTWARE

Intuitive mobile and web applications for local and remote Smart Lock access control. All KoreLock-powered locks can be integrated with any cloud software providing access to multiple hardware and software integrations.
